Cal-Turf

HYBRID BERMUDA GRASS

**The Quick, Easy Way
to Fine Turf**

WHY USE BERMUDAS?

The Cal-Turf Bermuda grasses are extremely well adapted for Southern California climatic conditions. These Bermudas have far better color and texture than common Bermuda grass and make a lawn that is as beautiful as it is hardy. The tightness of growth will give maximum competition to weeds and this tight growth will give a turf that can stand a great amount of wear. Insects and diseases rarely are a problem with these Cal-Turf Bermudas. Since no viable seed is produced, there is no germination of Bermuda in flower beds or other areas where grass is not wanted.

HOW TO PLANT

Your nurseryman has these Cal-Turf hybrid Bermudas available by the flat. Each flat can be divided into approximately 200, 1½ inch plugs. These plugs can be planted on 12-inch centers. At this rate, 5 flats would be needed for each 1000 square feet. About sixty days or less of warm weather will be needed for the area to be covered over com-

pletely. One can use more flats and plant the plugs closer together if faster coverage is wanted.

CARE

The Cal-Turf Bermuda grasses are managed as any other type of lawn. Regular fertilization will keep the lawn looking its best and close, weekly mowing will keep the turf tight and smooth. Since the Bermudas will root deeply, irrigation should be long and deep and only when the grass shows the need.

VARIETIES

TIFGREEN. This is the finest texture of improved Bermuda. It is a beautiful deep-green color, and resembles the color and texture of a fine putting green. Very prostrate grower with few seed heads. Excellent for use on home lawns, golf tees and playground areas. May go off color slightly earlier during the cold winter than other hybrid Bermudas.

SUNTURF. (Magennissi) A fine textured Bermuda with a distinctive dark-green color. Holds color very

well during cold weather. Easy to keep in confined areas. Will stand heavy traffic and abuse.

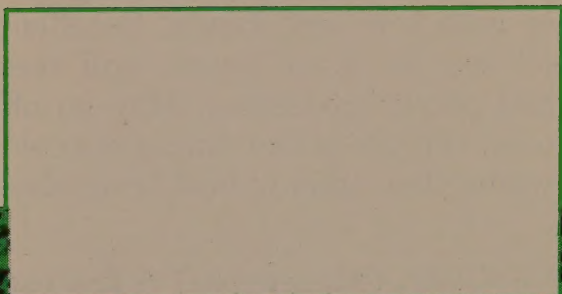

ORMOND. (Everglades #3) Finer texture than common Bermuda. Very rapid and aggressive grower. Will crowd out common bermuda in time. A good blue-green color. Excellent for home lawns, golf tees and playgrounds.
